

HOW TO HELP PREVENT **CLIMATE CHANGE**

IN YOUR OWN LITTLE WAY

WWW.RISINGSUNENERGY.ORG

CONSERVE WATER

Watch your water usage. Take shorter showers, skip showers and wash your laundry with cold water.

REDUCE WASTE

Help reduce greenhouse gas emissions by practicing regular recycling, buying recycled goods, using reusable grocery bags, and composting.

SAVE ENERGY

Use less energy by turning off appliances when not in use, switching to energy-saving bulbs, and investing in energy-efficient appliances/devices.

TRAVEL GREEN

1/3 of the world's harmful emissions are caused by vehicles; therefore, ditching your car and walking or riding public transport helps lessen them.

CLEAN ENERGY

Try using renewable energy by installing solar panels and generating your own energy.

START SMALL

The little things make a difference - planting trees, buying local produce, and eating a vegetarian meal help reduce your carbon footprint.
